Dear Harold:

Frank never even mentioned the "title" of his book nor is it listed in Forthcoming Books so evidently publication appears far from immediate. His only comment was to the effect that the conspiracy charge against Ray was made simply because he mentioned a brother while purchasing a gun!

Kaiser affirmed his conspiracy belief on a radio show in conjunction with the paperback release of his book, the "blurb" on its cover challenging the F.B.I. to reopen the case.

The Turner and Seigenthaler books are due for momentary publication.

I get the N.O. papers on a sporadic basis but I'll

be glad to send you what I receive.

Gurnish on J.G.: "How do you figure out an insane man?"

I would substitute the word "psychotic" for insane. J.G. lies so demonstrably ("I gave no interviews") that I can retain little belief in his probity.

Of course, "a frame" is possible....

My reaction to "The Papers" was: So what else is new? The information seemed stale and often misleading. It is obvious that Federal Agencies knew of their pending publication for months and thus indirectly sponsored their release.

The Mc Govern letter is odd but only that.

Unfortunately the control of both parties was never more secure.

You will receive under separate cover Washington Monthly. It contains a very revealing article on publishing.

Best Wishes,
